

FIN SUPER is a high-performance penetrating dry-film aerosol lubricant fortified with MicPol® technology. MicPol® is a unique technology that reduces the smoothest substance known to man (PTFE) to very small (0.01-0.03 microns) particles, allowing them to penetrate every pore of the surface. More importantly, MicPol® polarizes the PTFE particles so that they strongly adhere to surfaces magnetically. This results in a solid, very smooth dry film that offers a much stronger bond than any oil viscosity can provide, and lasts up to 10 times longer than other lubricants.

FIN SUPER is formulated for the demanding, high-pressure environment of the production and manufacturing industries. Our products are formulated to save businesses money on maintenance and downtime due to equipment malfunction.

FIN SUPER is for the lubrication of all moving parts, including chains, cables, gears, rails, tracks, valves, locks, firearms, and practically any other piece of equipment that needs lubrication or protection from rust. The excellent penetrating abilities of **FIN SUPER** allow it to free seized and rusted parts in minutes. It offers excellent protection against moisture and corrosion. It will replace multiple other lubricants.

FIN SUPER is available through your local Technical Advisor and online exclusively from Amazon.com. Just search "Interflon Fin Super" on Amazon to be taken right to our store page.

Visit our website at InterflonUSA.com to find out if there is a Technical Advisor in your area, and to learn more about our products.

Would you like a **FREE** can of FIN SUPER delivered to your door?

Verified Amazon Fin Super purchasers who leave a review of **FIN SUPER** on Amazon can receive a second can of FIN SUPER shipped to any address in the U.S. We want your honest opinion! Just post your review, then send an email to orders@interflon.com letting us know where to send your free can. We'll get it out to you right away! This offer is good until January 31, 2019. Limit: One per customer.

INTERFLON

FIN SUPER

Introducing
Interflon FIN SUPER

The Ultimate Tool in a Can!

See the back of this brochure for a special offer.

Interflon FIN SUPER has thousands of uses! Below are just a few of the most common.

CHAINS AND WIRE ROPE

FIN SUPER lubricates and protects chains used in industrial equipment. Also excellent for all cycle chains, gears, and sprockets. FIN SUPER is highly resistant to high pressure and mechanical wear. The dry film will prevent dirt adhesion. Lubricates and protects wire rope.

CARS, TRUCKS, CYCLES, ATVS

Use FIN SUPER on squeaky dashboards, rubber door seals, cables, electrical connections, locks, hinges, safety belt tensioners, exhaust pipe sensors, and seat rails.

PENETRATES AND PREVENTS RUST

FIN SUPER's unique MicPol® technology forms a solid barrier that moisture cannot penetrate. To free up rusted items, just spray, let sit for five minutes, twist, and loosen.

ELECTRICAL & ELECTRONICS

FIN SUPER's dielectric properties allow it to be sprayed directly onto all electrical connections, circuit boards, plugs, sockets, and wires to protect them from corrosion.

BLADES

FIN SUPER is ideal for protecting cutting edges. Apply it to all types of utility (non-food) blades before use to maintain fine edges and help prevent damage or corrosion.

ZIPPERS AND SNAPS

FIN SUPER makes zipper tracks and snaps move and fasten much more smoothly, and prevents them from rusting. MicPol®'s magnetic adherence means it lasts up to ten times longer than other lubricants.

OUTDOORS

FIN SUPER is an all-purpose firearms lubricant. The dry film prevents accumulation of particles in barrels, chambers, etc. Perfect for lubing and protecting fishing rods, reels, and tackle. Also excellent for use on camping equipment.

PNEUMATIC TOOLS

FIN SUPER will lubricate and protect all moving pieces, such as triggers, levers, handles, and valves, and will also protect and renew rubber and plastic seals, gaskets, and O-rings. Spray FIN SUPER into the air inlet.

INDOORS

FIN SUPER has thousands of uses around the home. Use it on all locks, tracks, rails, hinges, pulleys, knobs, tools, and anything else that needs lubricating or protecting.

BOATS & WATERCRAFT

Use FIN SUPER to lubricate all moving parts on board sailboats, motorboats, jetskis, and more. It will also protect metal items from corrosion, even under high-pressure salt water spray. Excellent for rigging maintenance.
